PROFESSIONAL SUMMARY

Senior Software Engineer with **7+ years of experience** driving technical vision, code quality, and scalable React.js architecture across enterprise web applications. Specialized in **Next.js (App Router)**, **TypeScript**, **Redux**, and **microfrontend architecture** — delivered up to **3x performance gains** on data-heavy enterprise dashboards. Proven track record in conducting **code reviews**, **mentoring engineering teams**, **leading sprint planning & estimations**, and partnering with UX/UI designers and backend engineers to deliver seamless user experiences. Strong background in **custom data visualizations (D3.js)** and component-driven design.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Java
Frontend Frameworks: React.js, Next.js (App Router), React Native, Svelte, jQuery
State Management: Redux, Redux Toolkit, React Hooks, Context API, Custom Hooks
Architecture: Microfrontend, Component-Driven Architecture, Monolithic Apps, MVC
Styling: Tailwind CSS, Material UI, Styled Components, Bootstrap, CSS Modules
Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, WebSockets
Data Visualization: D3.js, Three.js, SVG
Databases: MongoDB, MySQL, Firebase
Auth & Security: JWT, OAuth, Keycloak, 2FA (TOTP), MD5, SHA
Testing & Build Tools: Jest, React Testing Library, Webpack, Babel, npm, yarn, Prettier, ESLint
DevOps & CI/CD: Git, GitHub Actions, CI/CD Pipelines, App Signing & Binary Builds
Cloud & Hosting: Vercel, Firebase Hosting
Payment Integration: Razorpay, CCAvenue
Other: Electron, Moment.js, Docusaurus, Agentic AI (Claude Code, Codex)
Methodologies: Agile, Scrum, Code Reviews, Architecture Planning, Sprint Planning & Estimations

EXPERIENCE

NeoSoft Technologies Senior Software Engineer

Jun 2025 – Present
Mumbai, India

- Drove technical vision and best practices for the front-end team across **5+ enterprise React.js applications**, defining scalable, maintainable architecture using Next.js, TypeScript, and component-driven patterns
- Led performance optimization initiatives, achieving a **3x performance improvement** in the Option Chain module through component refactoring, custom virtualization, and API restructuring; profiled with React DevTools to resolve complex rendering bottlenecks
- Conducted code reviews and **mentored 3+ junior developers and interns**, enforcing coding standards, React.js best practices, and component-driven architecture across the team
- Participated in sprint planning, effort estimations, and architecture discussions; evaluated and introduced new tools (Agentic AI — Claude Code, Codex; custom virtualization libraries) to improve team productivity and code quality
- Collaborated closely with UX/UI designers (Figma → Production) and backend engineers to integrate REST and GraphQL APIs, ensuring seamless end-to-end user experiences
- Built highly reusable component libraries following component-driven architecture, reducing development time and enabling cross-team code reuse
- Architected real-time enterprise dashboards (Option Chain, Mutual Funds) with WebSocket-based market data streaming
- Developed full-stack applications using **Next.js App Router** with server actions, dynamic routing, authentication, role-based access control, and SEO optimization
- Implemented custom data visualizations using **D3.js** — interactive graphs and optimized SVG rendering for large datasets

Netcore Cloud Senior React Developer

Feb 2024 – Mar 2025
Thane, India

- Revamped a legacy React web application to meet modern usability and performance standards, achieving **90% improvement** in UI consistency and accuracy

- Resolved critical legacy bugs by analyzing root causes and implementing optimized fixes, improving application stability and code maintainability
- Collaborated with the Tech Lead to analyze new product features, estimate frontend development effort, and recommend scalable solutions aligned with product goals in an Agile environment
- Contributed to Program Increment (PI) tasks; delivered the **key frontend feature of the quarter** (Undo/Redo, Version Management, Click Tracking) with minimal bugs and high stability

Shifa Infotech

Apr 2023 – Jan 2024

Software React Native Developer

Jogeshwari, Mumbai

- Collaborated with stakeholders to plan and align on quarterly deliverables, ensuring successful and timely delivery of prioritized tasks

Mypcot Infotech

Feb 2021 – Mar 2023

Senior React Native Developer

Mumbai, India

- Built pixel-perfect React Native UIs for iOS and Android, collaborating with the design team for accuracy and consistency
- Created custom, reusable components ensuring smooth functionality across both platforms
- Integrated Firebase, Razorpay, CCAvenue, GPS, Camera, and Biometrics APIs
- Built and deployed iOS/Android binaries for Play Store and App Store
- Mentored junior developers, enhancing team productivity

Blocklogy

Mar 2020 – Jan 2021

Software Developer

Navi Mumbai, India

- Built blockchain-based DApps (Ethereum v4 & v5) with reusable React components
- Integrated third-party APIs and resolved complex bugs

Tantra-Gyan

Feb 2019 – Mar 2020

Software Solution Developer

Mumbai, India

- Developed UI components using React.js and Laravel Blade
- Integrated Camera and Location APIs into applications

KEY PROJECTS

Stock Trading Platform (Web) | *React.js, Node.js, Express.js, WebSockets, MongoDB, MySQL, Keycloak* Jun 2025 – Nov 2025

- **Team Size: 3**
- Architected and developed the **Option Chain module from scratch** as front-end lead, achieving **2x performance improvement** through code optimization, custom virtualization, API restructuring, and database query tuning
- Implemented a custom **visible-area (virtualized) listing** technique that significantly reduced DOM load and improved scroll responsiveness
- Designed and built RESTful APIs using Node.js and Express.js for seamless service-to-service communication
- Worked extensively with MongoDB and MySQL for data modeling, indexing, and query performance optimization
- Implemented **Two-Factor Authentication (2FA)** by integrating Keycloak with an external TOTP library to strengthen login security

Scalable Documentation Platform (Docusaurus) | *React.js, Next.js, Tailwind CSS, TypeScript, WebSockets* 2025

- **Team Size: 3**
- Built a scalable documentation platform using **Docusaurus** for managing and presenting product knowledge
- Implemented **real-time collaborative editing** enabling multiple users to edit documentation simultaneously via WebSockets
- Translated Figma designs into a pixel-perfect, fully responsive UI; developed a customizable, reusable code editor component with live preview

Dynamic Content Editor (Microfrontend) | *React.js, JavaScript, Microfrontend, Git, Linux*

2024 – 2025

- **Team Size: 2**
- Built a **dynamic content editor** enabling real-time modification of webpage elements (text, images, links, styles) within a microfrontend architecture
- Implemented core editor features: Undo/Redo, History Management, DOM Picker, and Click Tracking
- Developed custom reusable templates including Back to Top, Coupon Drawer, Progress Bar, and Recently Viewed Products

Maak – Services Booking Mobile App | *React Native, Redux, REST, GraphQL, Firebase, JWT, TypeScript* 2022 – 2023

- Play Store | **Team Size: 3**

- Developed booking and secure payment features for a comprehensive multi-service platform with admin panel and end-user mobile app
- Integrated multi-language support to enhance accessibility across regions; implemented JWT token-based authentication for secure user sessions
- Enabled utility bill payments including electricity bills and mobile recharges

Packarma – Packaging Recommendation App | *React Native, JavaScript, ES6, REST, GraphQL, Firebase, JWT, Razorpay*2020

- **Team Size: 3**
- Built a mobile app helping businesses select cost-effective laminate packaging materials based on product type, material strength, shelf life, and sealing features
- Integrated Firebase for analytics and user management, and Razorpay for secure payment processing
- Delivered pixel-perfect UI from Figma designs; built custom reusable components ensuring code maintainability and future scalability

CORE COMPETENCIES

Technical Vision & Architecture Planning | Code Reviews & Coding Standards Enforcement | Team Leadership & Mentoring (3+ developers) | Performance Optimization & Profiling (React DevTools, Flipper) | Sprint Planning, Estimations & Agile Delivery | UI/UX Design Translation (Figma → Production) | Cross-Functional Collaboration (UX/UI, Backend, Product) | End-to-End Feature Ownership | Excellent Verbal & Written English Communication

EDUCATION

D.G. Ruparel College, Mumbai University
Bachelor of Science in Information Technology (BSc-IT)

2018
Mumbai, India
